Solutions
for Every
Industry

Established in 1984 in Buena Park, California

Formerly known as UFO Design, we are excited to announce our re-branding as we embrace a new era of innovation and expertise. We have a proud history of excellence in thermoforming, pressure forming, CNC machining, and assembly services. Over the years, we have expanded our capabilities and facilities to better serve our clients, growing from our original 4,600 sq. ft. space in Huntington Beach to a state-of-the-art 30,000 sq. ft. facility today.

As a company now led by a dynamic young generation, UFO Technologies is poised to focus heavily on aerospace and medical device technologies. Our commitment to producing high-quality parts, ensuring on-time delivery, and delivering exceptional customer service remains unwavering. We leverage advanced rotary forming technology and cutting-edge CNC machines to meet a broad spectrum of manufacturing requirements.

30+

Years of Experience

500+

Projects Successfully Completed

with **150+ clients**

Our Core Values

Customer Focus

Quality

Integrity

Collaboration

Innovation

Sustainability

Expertise in Precision Medical Components Manufacturing

Products

- Dilation Totes
- Product Trays
- Laser Dental Equipment Covers
- Dust Cover
- Medical Cart Drawer
- Medical Cart Top Cover
- Plastic Shoe Holders
- Plexiglass Safety Shield

Aerospace Manufacturing Excellence

Products

- Aircraft Seat Panels
- Protective Covers
- Aircraft Overhead Console
- Aircraft Bulk Head Monitor Shroud
- Aircraft Engine Shroud
- Toilet Shroud
- Side Scoops - Subwoofer Cover
- Interior Panels for Early Model Piper Aircraft
- Case for FAA

Innovative Solutions for Communication Systems

Products

- Radome Cover
- Battery Charger Cover

Diverse Manufacturing Capabilities for Commercial Needs

Products

- Aquarium Covers & Light Housings Trays
- Tray Pet Cage
- Polypropylene Troughs
- Acrylic Rings
- Plastic Steps
- Bait Case
- Plastic Liner
- Plastic Covers
- Headlamp Buckets

Driving Innovation in Electric Vehicle (EV) Manufacturing

Products

- Front Fascia
- Dash Tray

Customized Solutions for the Food Industry

Products

- Decorative Bar Panels
- Supermarket Door Bumpers

Why Choose Vacuum Forming?

3.4 M lb
Vacuum Formed

Vacuum forming is a versatile and cost-effective manufacturing process that transforms thermoplastic sheets into precise 3D shapes.

It's ideal for creating custom parts with consistent quality, offering flexibility for various industries like medical, aerospace, electronics, transport, and more. With low tooling costs and fast production cycles, vacuum forming allows businesses to innovate while staying within budget.

Cost-Effective

Quick Turnaround

Large Part Capabilities
